

BP COURIERS

Web App — Ad Creative & Marketing Plan

Selling convenience — book a courier in 60 seconds at bpcouriers.online · no app store, any device

1. The opportunity

BP Couriers now runs as a full web app at bpcouriers.online — customers can book, track, schedule and pay from any phone or laptop, with nothing to download. The native iOS and Android apps are still in store review, so the web app is the channel we push now. It is also installable: in a few taps it sits on the home screen and behaves like a real app (offline-ready, push notifications, opens in one second).

Goal: drive bookings through the web app and grow a base of “installed” users who treat BP like a native app — well before the store apps land.

2. Positioning & core message

One line: “Book a courier in 60 seconds — from any device, no app store.”

- **Convenience first.** We sell the feeling of “done in under a minute”, not features for their own sake.
- **No friction.** No 100 MB download, no account wall to look around, works on the phone they already have.
- **Local & reliable.** Islandwide — Kingston, Montego Bay, Ocho Rios, Mandeville, Negril — with live tracking and proof of delivery.

3. Why the web app wins (the convenience pitch)

- **Instant.** Tap a link, book a pickup in ~60 seconds. No store, no install required to start.
- **Every device.** iPhone, Android and laptop from the same link — bpcouriers.online.
- **Feels native when installed.** “Add to Home Screen” gives a real app icon, full-screen, push alerts and offline access to past bookings + saved addresses.
- **Always current.** No app updates to chase — everyone is on the latest version automatically.

4. The booking experience

Lead every ad back to how easy it is. The flow we show:

1. **Enter pickup** — address or saved location.
2. **Enter drop-off** — and parcel details.
3. **Confirm & pay** — get a BP-2026-XXXXXX reference and live tracking.

Shortcuts on the installed app jump straight to Book, Track and My Deliveries.

5. Feature highlights to rotate through

- **Book in 60 seconds** · Live GPS tracking · Schedule ahead
- **Pay online** · Proof of delivery · Saved addresses
- **Islandwide reach** · Push notifications (“your driver is 2 minutes away”)

6. The “install it” campaign

A dedicated push showing how easy it is to put BP on the home screen — point everyone to bpcouriers.online/install.

- **Android — easiest.** Chrome offers an Install pop-up automatically (or ⋮ menu › Install app). One tap and it is on the home screen.

- **iPhone — a couple extra taps.** Must use Safari: Share button › “Add to Home Screen” › Add. ~10 seconds.
- **Laptop — simple.** Chrome/Edge show an install icon in the address bar — one click and it opens in its own window.

Creatives for each are included (feed, story and printable flyer per platform, plus an all-devices flyer).

7. Creative inventory (in this folder)

Asset	Size	Best for
Feed 1 — Book in 60 seconds	1080×1080	IG/FB feed, LinkedIn, WhatsApp status
Feed 2 — Book. Track. Pay.	1080×1080	Feature showcase post
Feed 3 — No app store	1080×1080	Convenience + bridge to install
Stories 1–3	1080×1920	IG/FB/WhatsApp stories & reels covers
Install guide — iPhone	feed/story/flyer	How-to for iOS (Safari)
Install guide — Android	feed/story/flyer	How-to for Android (Chrome)
Install guide — All devices	1080×1350	Printable / pinned post, covers laptop

8. Suggested 2-week launch calendar

Day	Post	Format
Mon	Book in 60 seconds (launch)	Feed 1 + Story 1
Wed	Everything in one place	Feed 2 + Story 2
Fri	No app store / any device	Feed 3 + Story 3
Sun	How to install — iPhone	iOS feed + story
Tue	How to install — Android	Android feed + story
Thu	Get it on any device	All-devices flyer
Sat	Customer reminder / repost best performer	Story

9. Captions & hashtags

Full ready-to-post captions are in CAPTIONS-and-howto.md in this folder. House hashtag set:

#BPCouriers #Jamaica #JamaicaDelivery #Courier #Logistics #Kingston #MontegoBay #OchoRios #Mandeville #Negril
#BookOnline #IslandwideDelivery

10. CTAs, links & tracking

- **Primary CTA:** “Book now — bpcouriers.online”.
- **Install CTA:** “Add BP to your home screen — bpcouriers.online/install”.
- **Deep links:** /book, /track, /dashboard. Put bpcouriers.online in the IG/FB bio link and the QR on flyers.
- **Tracking:** the manifest already tags installed launches (utm_source=pwa); add ?utm_source=ig to bio links to see social-driven traffic.

11. What “good” looks like (KPIs)

- **Bookings** started via web (and % completed).
- **Installs** — “add to home screen” / appinstalled events, and returning installed users.
- **Engagement** — saves/shares on the install how-to posts; link taps from bio.

Quick win: pin Feed 3 (“no app store”) and the all-devices install flyer to the profile so new visitors immediately see how to get BP on their phone.
