01 Executive Summary

Twenty years of credibility. Eight language tracks. Ministries, embassies and corporates already on the client list. What The Language Cradle has never had is a marketing machine equal to its story. This plan builds that machine.

The asset: The Language Cradle (IBLC — International Business & Language Consulting) is a Language and Cultural Intelligence Institute founded in Hong Kong in 2006 and headquartered in New Kingston, Jamaica. It serves individuals, corporate teams, executives, international students, embassies and government agencies across ten countries, with nine priced service lines from US\$29 e-books to US\$10,000 corporate engagements, a flagship Global Voice™ executive programme, and a fully built learning platform: 18+ live courses, 181 guided modules, 8 language tracks, certificates, final exams and an AI practice tutor (Lyra).

The objective: own the business-language conversation on Instagram and Facebook globally, convert that attention into three revenue streams (Global Voice™ cohorts, corporate contracts, app enrolments), and run the whole operation as a learning system where every week's results decide the next week's moves.

THE STRATEGY IN FIVE SENTENCES

- **Tell one continuous story.** Season 1 is a 13-week “90-Day World Tour” through the markets IBLC already serves — Asia, Latin America, Europe, then the corporate floor and the app launch. Every post is an episode, not an interruption.
- **Build for sends and saves, not likes.** Instagram's 2026 algorithm weights DM shares 3–5× likes; carousels and phrase-sheets are engineered to be saved and forwarded to colleagues — the exact behaviour of our B2B audience.
- **Treat Facebook as a community engine.** Groups reach 20–40% of members organically versus 1–6% for Pages. The Global Boardroom group plus long-form founder essays rebuild organic reach the Page alone cannot.

- **Make every click traceable.** Fourteen branded short-links on jsupremeconglomerate.online/s/ tag every channel with UTMs, so 'what is working' is a report, not a feeling.
- **Let previous decide future.** A Sunday 30-minute review ritual, a learning log, and twelve written decision rules turn performance data into next week's calendar — automatically.

WHAT SUCCESS LOOKS LIKE BY 13 SEPTEMBER 2026

Metric	Baseline (set in week 1)	Season 1 target
Instagram reach / month	Record current	10× baseline
Saves + sends per post (avg)	Record current	≥ 3% of reach
Qualified conversations / month (consults + corporate inquiries + app sign-ups)	Record current	30+ / month by week 13
Global Voice™ cohort	—	1 full cohort enrolled (10–15 seats)
Facebook group members	0	500+ engaged members
Email / broadcast subscribers	≈0	400+ ('Boardroom Briefing')

Every number above is tracked through the short-link system and the weekly scorecard in the companion workbook — no vanity metrics, no guessing.

02 The Story We Are Telling

People don't follow language schools. They follow journeys. Ours is true, and it is cinematic: Hong Kong, 2006 — a Jamaican linguist builds an institute in the hardest market on earth, brings it home to Kingston, and spends two decades opening world markets for Caribbean business.

The brand narrative (the spine of every post)

Language is not just communication. It is access. It is power. It is opportunity.

That line — already on the website — is the thesis. Everything we publish proves it from a different angle: a Mandarin phrase that wins respect in Shenzhen proves it; a client story about an embassy briefing proves it; a student's certificate proves it; the founder's own Hong Kong-to-Kingston arc proves it. We never post 'content'. We post evidence.

Season 1: The 90-Day World Tour

Thirteen weeks, six acts, each act set in a market IBLCL already serves. The tour structure does three jobs at once: it showcases real credibility (countries served: Japan, China, India, Switzerland, Colombia, Venezuela, Jamaica, USA, UK, Canada), it gives every week a theme so content never runs dry, and it builds toward two commercial crescendos — the corporate push (weeks 9–10) and the app launch (weeks 11–12).

Weeks	Act	Story beat	Commercial job
1–2	The Cradle	Origin: Hong Kong 2006 → Kingston. Why business language, not tourist language.	Positioning + follow growth
3–4	Mandarin Money	Asia spotlight: China, Japan, the Hong Kong roots. Respect, ritual, trust.	Mandarin/Japanese courses + consultations
5–6	The Hemisphere Next Door	LATAM spotlight: Spanish closes deals; Colombia & Venezuela client base.	Spanish path + Global Voice™ cohort open
7–8	Old World, New Deals	Europe spotlight: Switzerland, Germany, France. Precision and diplomacy.	Translation/interpreting + corporate training
9–10	The Corporate Floor	B2B act: ministries, embassies, BPO and hospitality teams. ROI of fluency.	Corporate pilots + consultation bookings
11–12	The App Era	Product act: the institute in your pocket. 181 modules, certificates, Lyra AI.	App sign-ups + 7-Day Fluency Sprint
13	Graduation	Season recap, student results, Season 2 tease.	Final CTA wave + testimonial harvest

Storytelling frameworks (use one per post)

- **Hook → Story → Offer:** open with the stake (“He lost a US\$2M deal over one mistranslated email”), tell the 30-second story, close with the door (“This is what our Cultural Intelligence session prevents — link in bio”).
- **Before → After → Bridge:** student couldn't open a meeting in Spanish → now leads regional calls → the bridge is the course. Perfect for testimonials and certificate moments.
- **Documentary, not advert:** founder-voice essays on Facebook and LinkedIn read like memoir chapters (Hong Kong, the first embassy contract, why Patois is a business language). People share chapters; they skip adverts.
- **Open loops across episodes:** every Sunday Boardroom Briefing teases next week's market (“Next stop: Bogotá”), training the audience to come back — serialised television logic applied to a feed.

03 Market & Audience: Who We Speak To

Five buyers, two economies (B2B and B2C), one promise: fluency that pays for itself.

Persona	Who they are	Pain	What we sell them	Primary channel
The Regional Exporter	Caribbean/LATAM SME owner or trade lead expanding cross-border	Deals stall in Spanish/English gaps; no in-house capability	International Trade & Business Support (US\$1,200–8,000) + corporate Spanish	FB essays, IG carousels, WhatsApp
The Global-Bound Executive	Director/VP headed for an international posting or global role	Presence and influence collapse outside their first language	Global Voice™ (US\$1,500–5,000)	IG Reels, LinkedIn
The Government & Embassy Buyer	Protocol officers, ministries, diplomatic missions	Needs certified, discreet translation and culturally briefed delegations	Certified translation (US\$0.18/word, US\$2,500/day) + Cultural Intelligence	LinkedIn, referrals, PR
The BPO & Hospitality Operator	HR/Ops leads in Jamaica's BPO, tourism and hotel sectors	Staff language quality drives CSAT and contracts	Corporate cohorts (US\$4,200/12 seats) + Business English/ESL/Spanish	FB, LinkedIn, direct outreach
The Ambitious Professional	25–45 career-builders and students, Caribbean + diaspora	Wants a credential and real speaking confidence, not a streak app	App courses (US\$220–380) → certificates → Global Voice™	IG Reels/stories, the app

Where they live online

Instagram carries the aspiration economy (personas 2 and 5, plus the shop window every B2B buyer secretly checks). Facebook carries community, diaspora and Jamaican business networks (personas 1 and 4 — and the groups where they actually talk). LinkedIn — added by this plan — is where personas 3 and 4 sign contracts. The calendar routes each act's content to the persona it feeds.

The timezone map (for scheduling)

- Jamaica & Caribbean: UTC-5 year-round — the home base; evenings 7–9pm are prime.
- US East / Toronto diaspora: ET (UTC-4 in summer) — one hour ahead of Kingston; mirror Jamaican slots.
- UK & Europe (weeks 7–8 focus): post 8:00–9:00am Jamaica = 2–3pm Central Europe.
- Asia (weeks 3–4 focus): post 7:30–8:30pm Jamaica = 8:30–9:30am next morning in Hong Kong/Tokyo — evening posts literally wake up in Asia.

04 Positioning & The Offer Ladder

Not Duolingo. Not a dusty institute. The boutique global option: human-led, business-outcome, credential-backed — with its own app.

The position (say it everywhere)

The Language Cradle is the institute global business trusts: 20 years, 10 countries, ministries and embassies on the client list — and a learning platform in your pocket.

Against consumer apps: they gamify streaks; we certify professionals. Lyra (our AI tutor) plus human cohorts beats an owl with a guilt complex.

Against legacy corporate trainers: we are founder-led, Caribbean-rooted, culturally bilingual by birthright — and priced to pilot, not to procure for a year.

The offer ladder (ascension model)

Rung	Offer	Price	Job in the machine
0	Free: Boardroom Briefing broadcast + Business Phrase Pack (DM keyword)	US\$0	Capture attention; build the list
1	E-books & digital courses	US\$29–300	First transaction; self-qualifies learners
2	App courses & cohorts (Individual / Plus)	US\$220–380	Recurring learner base; certificate stories
3	Global Voice™ (Group / Hybrid / Private)	US\$1,500–5,000	Flagship; the brand's hero product
4	Corporate training & cohorts	US\$800–10,000	B2B revenue engine
5	Certified translation / interpreting & trade support retainers	US\$0.12–0.18/word; US\$1,500–2,500/day	Institutional trust + recurring contracts

Every campaign CTA maps to one rung. The calendar alternates rungs so the feed sells the ladder, not just one product. The funnel: free value (Reel/carousel) → capture (DM keyword PASSPORT → phrase pack + broadcast invite) → convert (book consultation / enrol) → ascend (course → Global Voice™ → corporate) → advocate (testimonial → referral).

05 Instagram Domination Playbook

Instagram in 2026 rewards exactly what a language institute can produce better than anyone: short teaching moments people send to colleagues. We will engineer for the send button.

What the 2026 algorithm actually ranks (and our answer)

Ranking signal (2026)	Weight	Our exploitation
Sends per reach (DM shares)	Highest — ~3–5× likes	Phrase-sheets and 'send this to your colleague before the Bogotá call' CTAs; content built to be forwarded
Watch time / completion	Critical for Reels	15–30s micro-lessons; the payoff phrase lands in the last 3 seconds
Saves	≈3× likes	Carousel cheat-sheets (checklists, false friends, email templates) designed as reference material
Likes per reach	Baseline	Comes free when the above work

- **Trial Reels (use weekly):** Instagram shows trial posts to non-followers first. Every week we trial 2 extra hook variants of the Monday lesson; the winning hook graduates to the main feed. This is the previous-determines-future principle running inside Instagram itself.
- **The 3-second rule:** viewers decide in under 3 seconds. Every Reel opens with the stake or the phrase — never a logo sting, never 'hey guys'.
- **AI auto-translation:** Meta now auto-translates captions and audio. For a language brand this is free international reach — we post in English and let Meta carry it to Spanish-speaking feeds; we also subtitle natively as a brand signature.
- **Instagram SEO:** the name field becomes “The Language Cradle | Business Language Training” (searchable keywords), captions open with keyword-rich first lines (“business Spanish for executives...”), alt-text written on every post.

Profile architecture (week-1 fixes)

- **Bio (3 lines):** “Fluent in opportunity 🌍 | Business language & cultural intelligence since 2006 | Trusted by ministries, embassies & global teams” + link: jsupremeconglomerate.online/s/lc-ig-bio
- **Pinned trio:** (1) brand manifesto Reel, (2) Global Voice™ explainer, (3) best-performing micro-lesson — refreshed monthly from the scorecard.
- **Highlights:** Start Here · Courses · Global Voice™ · Corporate · Results · The App (covers supplied in this kit).

The weekly engine (Tier B shown; variations in §10)

Day	Format	Pillar	Example (from week 5)
Mon	Reel — micro-lesson	Authority	“3 Spanish phrases that close deals in Bogotá”
Tue	Carousel — cheat sheet	Authority/Save-bait	“Spanish for exporters: the 8-line cheat sheet”
Wed	Reel — story	Story/Transformation	Client story: the Colombia engagement
Thu	FB-first essay, IG quote-	B2B Proof	“The US\$1B reason

Day	Format	Pillar	Example (from week 5)
	card		Caribbean firms must speak Spanish"
Fri	Reel — offer	Product	Spanish path tour → s/lc-courses
Sat	Stories set (3–5 frames)	Community	Tone quiz + poll + behind-the-scenes
Sun	Broadcast + review	Owned audience	Boardroom Briefing #5 + internal scorecard ritual

Signature mechanics (the growth loops)

- **“Comment PASSPORT” — DM automation:** every authority post invites a one-word comment; automation (ManyChat or Meta's native flows) replies with the Business Phrase Pack + broadcast-channel invite + s/lc-dm link. Comments feed the algorithm; DMs feed the list; the list feeds enrolment. Keywords: PASSPORT (phrase pack), VOICE (Global Voice™ brochure), TEAM (corporate one-pager).
- **The Boardroom Briefing (broadcast channel):** weekly Sunday drop — one power phrase, one cultural insight, one client win. Owned reach immune to feed decay; doubles as the email newsletter body.
- **Collab posts:** monthly co-authored post with a complementary brand (BPO recruiter, hotel group, trade body, business coach). Both audiences see it natively — borrowed reach at zero cost.
- **Comment concierge:** 30 minutes daily replying with substance on target accounts (JAMPRO, chambers of commerce, BPO firms, hotel groups, diaspora business pages) — the founder's expertise in other people's comment sections is a discovery engine.
- **Reply-to-comment Reels:** every good question in comments becomes next week's Reel (tap 'reply with Reel'). The audience literally writes the calendar — previous determines future again.
- **UGC engine:** students record 'my first phrase' clips and certificate moments; reposted weekly with credit. Social proof compounds without production cost.

06 Facebook Domination Playbook

Facebook is not dying for this audience — Jamaican business networks, diaspora communities and 35+ decision-makers live there. But the Page is a billboard; the Group is the building.

The two-engine structure

- **Engine 1 — The Page (authority):** revamped with services listed, reviews switched on, CTA button → s/lc-fb-page, and the Thursday long-form founder essay as its signature format. Facebook's 2026 distribution rewards Meaningful Social Interactions — long comments and shares-to-stories — which essays generate and link-dumps do not.
- **Engine 2 — The Group (community):** “The Global Boardroom — Business Language & Culture” launches week 1. Groups reach 20–40% of members per post versus 1–6% for Pages — a 10,000-member group out-reaches a 100,000-follower page. Programming: Monday phrase drop, Wednesday challenge (“say this in Spanish”), Friday member wins. The founder appears as host, not advertiser.

2026-specific plays

- **Reels via UTIS:** Meta's January-2026 User True Interest Survey model recommends Reels by demonstrated interest, not just engagement bait — it rewards niche consistency. Our relentless business-language focus is exactly what UTIS promotes. Cross-post all IG Reels with FB-native captions.
- **Long-form native essays:** 300–500-word founder chapters (“What Hong Kong taught me about trust”) + one photo. FB is the last major platform where text storytelling wins organically — and our founder's story is the inventory.
- **Events + Lead Ads:** monthly free webinar (“Doing business in Spanish: 40 minutes, no slides, real phrases”) run as an FB Event, retargeted with instant-form Lead Ads for corporate inquiries.
- **WhatsApp click-to-chat:** the Caribbean closes deals on WhatsApp. Story stickers, ad CTAs and the page button route to s/lc-wa — a pre-filled chat to +1 876 618-8822. Zero-friction lead capture matched to real local behaviour.
- **Diaspora & business groups:** value-first participation (never link-dumping) in Jamaican/Caribbean professional and diaspora groups — where personas 1 and 4 already gather.

07 The App Go-To-Market

The portal is not a side project — it is the proof that IBLC is a modern institute, and the lowest-friction rung on the ladder. We launch it like a product, inside the story.

Positioning

| *A language institute in your pocket — not another streak app.*

The receipts: 18+ live courses across 8 language tracks (Spanish A1→B2, Business English, ESL, French, German, Mandarin, Japanese, Jamaican Patois, plus Cultural Intelligence, International Trade, Sales English and the Jamaica Orientation series), 181 guided modules, structured learning paths, real final exams with certificates at a 70% pass bar, homework with human grading, live class plans — and Lyra, the AI practice tutor, for drilling between sessions.

The launch arc (weeks 11–12 of the calendar)

Phase	When	Moves
Tease	Week 10 (during corporate act)	Story countdowns, cryptic feature peeks (“something is coming to your pocket”), waitlist via s/lc-app
Reveal	Week 11 Mon–Wed	Screen-record demo Reel, '181 modules' carousel, Lyra AI demo Reel — each ending on s/lc-app
Adopt	Week 11 Fri – Week 12	The 7-Day Fluency Sprint: a public challenge run inside the app (one module a day, post your phrase). Sprint participants generate UGC; finishers get a certificate moment to share
Ascend	Week 12 Fri	Bundle close: app course + Global Voice™ discount for Sprint finishers — the ladder in action

Store readiness (when mobile ships)

The Expo mobile build and App-Store screenshot set already exist in the JST pipeline. When the store listing goes live: ASO title “Language Cradle — Business Languages”, keywords (business spanish, corporate english, language certificate), and the s/lc-app short link re-points to the store smart-URL — every QR code and bio link printed before launch keeps working. Until then the link serves the live web portal.

Action item discovered during this build: app.thelanguagecradle.com has no DNS record yet — the portal runs on language-cradle-app.vercel.app. Wire the subdomain (one CNAME at Namecheap + one domain add in Vercel) and update the lc-app short link's one line.

o8 What You'd Be Missing (Now Covered)

Instagram and Facebook win attention. These eight additions convert it, compound it, and protect it — most cost time, not money.

- **1. LinkedIn (non-negotiable for this brand):** embassies, ministries and corporate buyers don't sign contracts on Instagram. Founder profile optimised, weekly thought-leadership post (the Thursday essay, repurposed), company page, and a monthly newsletter — “The Global Voice Dispatch”. Target: 2 posts/week, all pointing at s/lc-li and s/lc-corporate.
- **2. Email via the Boardroom Briefing:** the broadcast channel's content doubles as a Resend-powered email (the J Supreme Resend account can add thelanguagecradle.com as a sending domain). Social reach is rented; the list is owned.
- **3. Google Business Profile + reviews:** “language school Kingston” and “certified translation Jamaica” searches currently go to competitors. Claim the profile, photograph the New Kingston office, and route every happy student to a review — 20 reviews changes local search permanently.
- **4. YouTube Shorts repurposing:** every Reel re-uploads to Shorts in 5 minutes/week. YouTube is the second-largest search engine; “learn business spanish” searches compound for years.
- **5. PR & institutional partnerships:** Gleaner/Observer business desks, JIS features, JAMPRO export programmes, AmCham and chambers of commerce, GSAJ (BPO sector), hotel groups, universities. One feature or MOU per month; each becomes a B2B Proof post — PR feeds the content engine.
- **6. Referral & ambassador programme (“The Cradle Circle”):** alumni get a named discount code; 3 referrals = a free Global Voice™ masterclass seat. Word of mouth, instrumented.
- **7. WhatsApp Business properly configured:** catalogue of services, away messages, labels for lead stages, and broadcast lists for cohort announcements — the local deal-closing channel, professionalised.
- **8. Tracking hygiene:** Meta Pixel + Conversions API on thelanguagecradle.com, UTM discipline via the /s links (this kit), and conversion events on the book/contact forms. Without this, paid media in \$9 flies blind.

09 Paid Media Plan

Organic proves the message; paid pours fuel on proof. We never boost hope — only winners.

Tier	Budget	Structure	Expected outcome
Spark	US\$300/mo (~US\$10/day)	Boost the week's top organic post (chosen by saves+sends, not likes) + retarget engagers with the offer of the current act	Cheap reach amplification; 2–4× organic reach on winners
Engine	US\$800/mo	Spark + always-on Advantage+ lead campaign (Global Voice™ + corporate pilot, instant forms) + lookalike of student list + WhatsApp-CTA ads in JM/Caribbean	15–30 qualified leads/mo; CPL benchmark US\$8–20 consumer, US\$25–60 corporate
Dominate	US\$2,000/mo	Engine + full-funnel: video-view campaigns feeding 75%-viewer retargeting, app-era install/sign-up push, diaspora targeting (NYC, Toronto, London, Miami)	Owns the niche regionally; feeds Season 2 with data

- **Creative testing matrix:** 3 hooks × 2 formats per offer, US\$5/day each for 5 days; winner takes the budget. Losers are data, not waste.
- **Decision rules:** CPL > 1.5× benchmark for 2 weeks → change creative before audience; frequency > 3 → refresh; a boosted post that drives ≥3 corporate DMs → its angle becomes an always-on ad.
- **Sequence:** no paid until week 3 — the first fortnight establishes organic baselines so paid lift is measurable (previous determines future, even here).

10 Content Calendar & Scheduling Variations

The full 13-week, ~90-row calendar lives in the companion workbook (LC-90-Day-Content-Calendar.xlsx) with hooks, CTAs, links and result columns per post. Here is the operating model — in three intensities, because a plan you can't sustain is a plan that fails.

Three scheduling variations (pick by capacity, upgrade by rule)

	Tier A — Foundation	Tier B — Growth (recommended)	Tier C — Domination
Workload	≈4 hrs/week	≈8 hrs/week	≈15 hrs/week or a VA
IG posts	3/wk (Mon-Wed-Fri)	5/wk (Mon-Fri)	7–10/wk incl. 2 Trial-Reel hook tests
Stories	Tue & Thu sets	Mon–Sat daily set	2× daily blocks + interactive AMA
Facebook	Cross-posts + Thu essay	Essay + group 3 programmed days	Daily group programming + weekly live
Broadcast/email	Sunday Briefing	Sunday Briefing	Briefing + mid-week phrase drop
Live	—	Monthly founder live	Weekly Wednesday live (1pm JA)
Monthly volume	≈12 posts	≈22 posts	30+ posts

UPGRADE / DOWNGRADE RULES

- Hit every publish target for 4 consecutive weeks AND saves+sends ≥ 2% of reach → move up one tier.
- Miss targets 2 weeks running → drop one tier without guilt. Consistency at Tier A beats collapse at Tier C — the algorithm punishes gaps more than modesty.

Posting windows (Jamaica time, UTC-5)

Window	Time (JA)	Who it catches	Use for
Morning professional	7:00–8:30am	Execs pre-work, Europe afternoon (2–3pm CET)	B2B carousels, corporate offers, Europe-act content
Lunch scroll	12:00–1:00pm	Office workers JA + US East	Quick lessons, polls, group prompts
Evening prime	7:00–9:00pm	Diaspora evenings, JA homes — and 8–10am next morning in HK/Tokyo	Reels, stories, story-arc episodes, Asia-act content
Sunday briefing	6:00pm	Planning mindset before the work week	Boardcast Briefing + next-week tease

Within each window, exact times come from the account's own Insights once two weeks of data exist — the workbook's scorecard has a column for it. Data over dogma.

11 Shareable Links & Tracking System

Fourteen branded short-links, live today on the conglomerate domain. Every channel gets its own door, so every result has a fingerprint.

How it works: jsupremeconglomerate.online/s/<slug> issues a 302 redirect to the destination with UTM tags baked in. Analytics (Vercel + the site's own tooling) then attribute every visit, booking and sign-up to the exact channel and campaign. Destinations can be re-pointed centrally — printed QR codes never go stale. QR codes for all fourteen links ship in this kit (03-links-tracking/qr/).

Short link	Points to	Use
/s/lc-bio	thelanguagecradle.com/	The one link in the Instagram bio. Every 'link in bio' CTA points here.
/s/lc-fb-page	thelanguagecradle.com/	Facebook Page website field + the page CTA button (Learn More).
/s/lc-li	thelanguagecradle.com/	Founder profile featured link + company page website field.
/s/lc-globalvoice	thelanguagecradle.com/global-voice	All posts/stories promoting the flagship executive programme.
/s/lc-corporate	thelanguagecradle.com/corporate	B2B posts, corporate pilot offers, LinkedIn outreach signatures.
/s/lc-courses	thelanguagecradle.com/courses	Posts promoting individual language courses and learning paths.
/s/lc-translate	thelanguagecradle.com/translation-interpretation	Certified translation / interpreting service promotions.
/s/lc-book	thelanguagecradle.com/book	Direct-response CTAs: 'Book your consultation' in Reels, stories, DMs.
/s/lc-app	language-cradle-app.vercel.app/	All app-era posts. Currently points to the live portal; swap one line when app.thelanguagecradle.com DNS is wired or stores go live.
/s/lc-story	thelanguagecradle.com/about	Origin-story posts (Hong Kong 2006 -> Kingston) and about-us shares.
/s/lc-wa	wa.me/18766188822?text=Hi%20The%20Language%20Cradle%2C%20I%27d%20like%20to%20learn%20more%20about%20your%20programmes.	Click-to-chat: story link stickers, FB ads, flyers. Opens a pre-filled chat to +1 876 618-8822.
/s/lc-qr	thelanguagecradle.com/	Any printed material: flyers, banners, business cards, event pop-ups.
/s/lc-news	thelanguagecradle.com/contact	'Join the Boardroom Briefing' CTAs until a dedicated signup page exists.
/s/lc-dm	thelanguagecradle.com/global-voice	The link the auto-DM sends when someone comments PASSPORT / VOICE.

UTM GRAMMAR (FOR ANY FUTURE LINKS)

- utm_source = where the click was born: instagram, facebook, linkedin, whatsapp, qr, email, social (multi-channel assets).

- utm_medium = the placement: bio, page, profile, share, dm, print, ad.
- utm_campaign = lc-<offer>-<year>: lc-global-2026, lc-globalvoice-2026, lc-corporate-2026, lc-app-2026...
- Add utm_content=<asset-name> manually when A/B testing two creatives for the same offer.

12 Measurement & The Learning Loop

"Always rely on previous to determine future" — your words, now an operating system. Nothing in this plan is permanent except the ritual that revises it.

The KPI tree

- **North star:** qualified conversations per month — booked consultations (s/lc-book) + corporate inquiries (s/lc-corporate + WhatsApp) + app sign-ups (s/lc-app).
- **Leading indicators (weekly):** reach, follows, saves/reach %, sends/reach %, profile visits, link clicks by slug, DM keyword count, group joins, briefing subscribers.
- **Lagging indicators (monthly):** enrolments by rung, revenue by service line, cost per lead (paid), review count.

The Sunday Ritual (30 minutes, non-negotiable)

- 1. Fill the Weekly Scorecard tab (10 min) — numbers from IG/FB insights + Vercel link clicks.
- 2. Write the Learning Log line (10 min): top post and why, bottom post and why, one audience signal noticed.
- 3. Apply the Decision Rules (10 min): adjust next week's calendar rows — swap hooks, promote pillars, kill formats. The calendar is written in pencil on purpose.

The twelve decision rules (the 'previous → future' engine)

#	If (previous)	Then (future)
1	Reel 3-second retention < 50% twice in a row for a hook family	Retire that hook family; pull a fresh one from the bank
2	Saves/reach ≥ 3% on any post	Turn it into a series (same format, new market) within 2 weeks
3	Sends/reach ≥ 1.5%	Boost US\$20–30 immediately (Spark tier) — the audience already endorsed it
4	Carousel completion < 40%	Cut to ≤ 6 slides; put the payoff on slide 2
5	A post drives ≥ 3 corporate DMs	Replicate the angle next week aimed at the same persona
6	Story poll/quiz response > 15%	That topic becomes next Monday's Reel
7	Trial Reel beats control hook	Winning hook graduates to main feed; loser logged
8	A week's act underperforms its predecessor by >40% reach	Compress that act; extend the strongest act in Season 2
9	DM keyword volume drops 2 weeks straight	Refresh the lead magnet (new phrase pack theme)
10	CPL > 1.5× benchmark for 2 weeks	Change creative first, audience second, offer last
11	Monthly: a pillar lands in top quartile	+1 weekly slot next month; bottom pillar –1 (portfolio rebalancing)

#	If (previous)	Then (future)
12	Quarter end	Full reset: rebuild Season 2 calendar from the Learning Log, not from scratch

Rules live in the workbook beside the log they feed on. Anyone on the team can run this system — that is the point: the strategy survives busy weeks because it is written down as if/then, not vibes.

13 The 30/60/90 Roadmap & First 14 Days

First 14 days (the ignition checklist)

- Day 1–2: Claim/confirm handles; apply bio + name-field spec; install the six highlight covers; set page CTA buttons to the /s links (already live).
- Day 2–3: Install Meta Pixel + CAPI on thelanguagecradle.com; verify the domain in Meta Business Suite; switch on FB reviews.
- Day 3–4: Launch “The Global Boardroom” FB group + “Boardroom Briefing” IG broadcast channel (seed with 3 pieces of content each).
- Day 4–5: Set up DM automation keywords (PASSPORT / VOICE / TEAM) and the Business Phrase Pack PDF lead magnet.
- Day 5–7: Publish the pinned trio using the supplied creative templates; record baseline metrics in the scorecard (this is 'previous' for week 1's 'future').
- Week 2: Run Season 1 week-1 calendar rows; first Sunday Ritual; book the first collab partner; draft the first PR pitch (Gleaner business desk).
- Ongoing: wire app.thelanguagecradle.com DNS; add thelanguagecradle.com to Resend for the email edition of the Briefing.

30 / 60 / 90

Milestone	By day 30	By day 60	By day 90
Story arc	Acts 1–2 done (Cradle, Asia)	Acts 3–4 done (LATAM, Europe) + corporate push live	App era + Graduation; Season 2 built from the log
Audience	Baselines set; group founded; briefing live	Group 200+; briefing 200+; first collab posted	Group 500+; briefing 400+; UGC flowing weekly
Revenue motion	DM funnel live; first consultations booked	Global Voice™ cohort enrolling; 2 corporate pilots proposed	Cohort closed; app sprint run; 30+ qualified conversations/mo
System	Scorecard + log running 4 weeks	Paid Spark tier on winners; first rules fired	Quarterly reset executed; Season 2 calendar issued

14 Appendices: Captions, Hashtags & Kit Inventory

Appendix A — Caption starters (full 18-caption bank in the workbook)

- **Manifesto:** “Your next client doesn't speak English. The world does business in Mandarin, Spanish, French — and in culture. Since 2006 we've made leaders fluent in all of it. We don't teach languages. We open markets. → Link in bio”
- **Micro-lesson:** “Three Spanish phrases that close deals in Bogotá co (save this for your next call): ... Send this to the colleague who has that call on Friday. Want the full exporter's pack? Comment PASSPORT.”
- **Founder story:** “Hong Kong, 2006. A Jamaican linguist opens an institute in the world's toughest market... Twenty years later, ministries and embassies call us first. This is why. → s/lc-story”
- **Corporate:** “Your team's English is your brand. Ask Jamaica's BPO sector. We train teams that sound like headquarters — in 90 days. Pilot programme for 12 seats → s/lc-corporate”
- **App:** “181 modules. 8 languages. Real certificates. An AI tutor named Lyra. The institute is now in your pocket. → s/lc-app”
- **Global Voice™:** “Speak. Influence. Lead. In 8–10 weeks you'll command international rooms — or you'll know exactly what's holding you back. Cohort opens [date] → s/lc-globalvoice”

Appendix B — Hashtag & SEO architecture

- **Set A (broad, pick 3):** #businessenglish #learnspanish #languagelearning #globalbusiness #careergrowth #professionaldevelopment #leadership #communicationskills
- **Set B (niche intent, pick 4):** #businessspanish #corporatetraining #culturalintelligence #executivecoaching #internationaltrade #translationservices #esl #interpreter #bpojamaica #exporters
- **Set C (branded/local, pick 3):** #thelanguagecradle #globalvoice #fluentinopportunity #jamaicabusiness #caribbeanbusiness #kingstonjamaica #diasporabusiness #caribbeantolatam
